

ACQUISITION CRITERIA

European Science Park Group – Target acquisition criteria

ESPG is constantly looking to grow its portfolio with meaningful acquisitions that complement and strengthen our portfolio.

Our key criteria are:

- **Specialist space:**
Research and development (R&D) carried out on at least a small part of the lettable area, with a preference to permitted labs, clean rooms etc. All industries considered – healthcare and climate change engineering preferred.
- **Campus idea:**
Similar tenants and industries in same building or nearby.
- **Location:**
Often located close to university or (private) research institutes. Regional champions and leading market towns targeted – proven science to mirror German Mittelstand locations.
- **Profile:**
Value-Add potential such as vacancy, short-term leases, renovation require, etc.
